DETAILED ACTION

Allowable Subject Matter

1. Claims 9-16 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The specific process for improving the solderability of a metal surface which includes, *inter alia*, contacting the metal surface with an immersion silver plating solution thereby producing an immersion silver plate upon the metal surface, and thereafter treating the silver plated metal surface with a solution comprising an additive selected from the group consisting of fatty amines, fatty amides, quaternary salts, amphoteric salts, resinous amines, resinous amides, fatty acids, resinous acids, ethoxylated versions of any of the foregoing, and mixtures of any of the foregoing was not taught or suggested by the prior art of record.

With respect to the prior art of record, the reference of Wakita teaches the enhancement of solderability using silver plated copper powder and the addition of fatty acids to increase the dispersion, however the additives are added to the plating solution and are not used as a subsequent treatment after the layer is formed. The prior art of Ferrier (EP 0 797 380 A1) although it teaches of silver immersion plating, is silent with respect to subsequent treatment with a solution using an additive as claimed by Applicant.

Art Unit: 1741

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
